NOTE TO THE READER	7
LIST OF PARTICIPANTS	9
PREAMBLE	15
Background	15
Objective and Scope	15
Selection of Topics for Monographs	16
Data for Monographs	17
The Working Group	17
Working Procedures	17
Exposure Data	18
Biological Data Relevant to the Evaluation of Carcinogenicity to Humans	19
Evidence for Carcinogenicity in Experimental Animals	20
Other Relevant Data in Experimental Systems and Humans	22
Evidence for Carcinogenicity in Humans	23
Summary of Data Reported	26
Evaluation	27
References	30
GENERAL REMARKS	33
THE MONOGRAPHS	39
<i>Organic solvents</i>	
Some petroleum solvents	43
Toluene	79
Xylene	125
Cyclohexanone	157
Dimethylformamide	171
Morpholine	199
<i>Solvent stabilizer</i>	
1,2-Epoxybutane	217
<i>Resin monomers and related compounds</i>	
Bis(2,3-epoxycyclopentyl)ether	231

CONTENTS

Some glycidyl ethers	237
Phenol	263
<i>Some pigments</i>	
Antimony trioxide and antimony trisulfide	291
Titanium dioxide	307
<i>Occupational exposures in paint manufacture and painting</i>	
Historical perspectives and description of painting trades	329
Description of paint products	329
Pigments	329
Binders (resins)	331
Solvents	338
Additives	338
History of the manufacture of paints and related products	341
History of paint manufacture	341
History of lacquer manufacture	342
History of varnish manufacture	342
Construction painting and paint products used	343
Exterior house paints	343
Interior paints	344
Masonry paints	345
Waterproofing paints	347
Surface coating in the wood industry and products used	347
Painting in the metal industry and paint products used	348
Metal primers, finish coats and corrosion inhibition paints	348
Marine paints	349
Automobile coatings	351
Aluminium paints	352
Coil coatings	353
Other painting trades and paint products	353
Traffic paints	353
Fire-retardant paints	353
Aerosol colours	354
Paint and varnish strippers	354
Production and use of paint products	355
Production	355
Production processes	355
Production figures	357
Use	362
Uses and application methods	362
Use patterns	362
Exposures in the workplace	362

CONTENTS

Introduction	362
Manufacture of paints and related products	370
Construction painting and lacquering	374
Painting, varnishing and lacquering in the wood industry	377
Painting in the metal industry	378
Biological data relevant to the evaluation of carcinogenic risk to humans ...	385
Carcinogenicity studies in animals	385
Other relevant data in humans	386
Toxic effects	386
Effects on fertility and on pregnancy outcome	392
Genetic and related effects	396
Epidemiological studies of carcinogenicity in humans	397
Occupational mortality and morbidity statistics	397
Cohort studies or studies within a cohort	400
Case-control studies	403
Cancer in children in relation to parental exposure	419
Summary of data reported and evaluation	422
Exposures	422
Human carcinogenicity data	423
Other relevant data	424
Evaluation	424
References	425
SUMMARY OF FINAL EVALUATIONS	443
APPENDIX 1. SUMMARY TABLE OF GENETIC AND RELATED EFFECTS ..	445
APPENDIX 2. ACTIVITY PROFILES FOR GENETIC AND RELATED	449
EFFECTS	
SUPPLEMENTARY CORRIGENDA TO VOLUMES 1 TO 46	505
CUMULATIVE INDEX TO THE <i>MONOGRAPHS</i> SERIES	507

NOTE TO THE READER

The term 'carcinogenic risk' in the *LARC Monographs* series is taken to mean the probability that exposure to an agent will lead to cancer in humans.

Inclusion of an agent in the *Monographs* does not imply that it is a carcinogen, only that the published data have been examined. Equally, the fact that an agent has not yet been evaluated in a monograph does not mean that it is not carcinogenic.

The evaluations of carcinogenic risk are made by international working groups of independent scientists and are qualitative in nature. No recommendation is given for regulation or legislation.

Anyone who is aware of published data that may alter the evaluation of the carcinogenic risk of an agent to humans is encouraged to make this information available to the Unit of Carcinogen Identification and Evaluation, International Agency for Research on Cancer, 150 cours Albert Thomas, 69372 Lyon Cedex 08, France, in order that the agent may be considered for re-evaluation by a future Working Group.

Although every effort is made to prepare the monographs as accurately as possible, mistakes may occur. Readers are requested to communicate any errors to the Unit of Carcinogen Identification and Evaluation, so that corrections can be reported in future volumes.
