

A white mouse is shown in profile, facing left, in a laboratory setting. The mouse is standing on a reflective surface, and its reflection is visible below it. In the background, there are various pieces of laboratory glassware, including a large Erlenmeyer flask and a round-bottom flask, all slightly out of focus. The overall scene is dimly lit, with the mouse being the central focus.

SOME CHEMICALS THAT CAUSE TUMOURS OF THE URINARY TRACT IN RODENTS

¹ Working Group Members and Invited Specialists serve in their individual capacities as scientists and not as representatives of their government or any organization with which they are affiliated. Affiliations are provided for identification purposes only. Invited Specialists do not serve as Meeting Chair or Subgroup Chair, draft text that pertains to the description or interpretation of cancer data, or participate in the evaluations. Each participant was asked to disclose pertinent research, employment, and financial interests. Current financial interests and research and employment interests during the past 4 years or anticipated in the future are identified here. Minor pertinent interests are not listed and include stock valued at no more than US\$ 1000 overall, grants that provide no more than 5% of the research budget of the expert's organization and that do not support the expert's research or position, and consulting or speaking on matters not before a court or government agency that does not exceed 2% of total professional time or compensation. All grants that support the expert's research or position and all consulting or speaking on behalf of an interested party on matters before a court or government agency are listed as significant pertinent interests.

⁴ Each Observer agreed to respect the Guidelines for Observers at *IARC Monographs* meetings. Observers did not serve as Meeting Chair or Subgroup Chair, draft any part of a *Monograph*, or participate in the evaluations. They also agreed not to contact participants before the meeting, not to lobby them at any time, not to send them written materials, and not to offer them meals or other favours. IARC asked and reminded Working Group Members to report any contact or attempt to influence that they may have encountered, either before or during the meeting.

⁵ Heinz-Peter Gelbke holds shares of BASF SE, a company that produces melamine. He attended as an Observer for ReachCentrum SA, Belgium, on behalf of the Melamine Reach Consortium and at the request of the European Melamine Producers Association. The Melamine Consortium paid him an honorarium and paid his travel costs for his participation as an Observer.

⁶ Matilde Ibanez Gomez is employed as a toxicologist at Solvay SA, a chemical company that manufactures vinylidene chloride. Solvay is the EU REACH registrant for this substance. She attended as an Observer for Solvay SA, Belgium.

⁷ Erik K. Rushton is employed by and holds stock from LyondellBasell, a company that has an interest in tetrahydrofuran. He attended as an Observer for LyondellBasell Industries, The Netherlands.
