

# Contents

<b>List of Participants .....</b>	1
<b>Preamble .....</b>	3
<b>General Remarks .....</b>	15
<b>1. Introduction .....</b>	15
1.1 Observational studies of colorectal cancer .....	16
1.2 Studies in experimental animals .....	16
1.3 Drugs considered .....	16
<b>2. Colorectal cancer .....</b>	16
2.1 Descriptive epidemiology .....	16
2.2 Biology of colorectal cancer in humans .....	16
2.3 Experimental studies .....	17
<b>3. Pharmacological action of non-steroidal anti-inflammatory drugs .....</b>	19
3.1 Synthesis and action of prostaglandins .....	19
3.2 Prostaglandins and human tumours .....	20
3.3 Alternative mechanisms .....	23
3.3.1 <i>Mechanisms independent of prostaglandins</i> .....	23
3.3.2 <i>Effects of non-cancerous tissues</i> .....	23
3.3.3 <i>Cytochrome P450</i> .....	24
<b>4. Adverse effects .....</b>	24
4.1 Ulceration .....	25
4.1.1 <i>Age</i> .....	25
4.1.2 <i>History of ulcer disease</i> .....	25
4.1.3 <i>Helicobacter pylori</i> .....	26
4.1.4 <i>Corticosteroids</i> .....	26
4.1.5 <i>Anticoagulants</i> .....	26
4.2 Asthma .....	26
4.3 Drug interactions .....	26
4.4 Taking account of toxic effects .....	27
4.5 Mitigating side-effects .....	27
<b>5. Recommendations for research .....</b>	28
<b>6. Procedures used .....</b>	29
<b>7. References .....</b>	29

# Aspirin

<b>1.</b>	<b>Chemical and physical characteristics</b>	43
1.1	Name	43
1.2	Structural and molecular formulae and relative molecular mass	43
1.3	Physical and chemical properties	43
1.4	Technical products	43
<b>2.</b>	<b>Occurrence, production, use, analysis and human exposure</b>	44
2.1	Occurrence	44
2.2	Production	44
2.3	Use	44
2.4	Analysis	44
2.5	Human exposure	45
<b>3.</b>	<b>Metabolism, kinetics and genetic variation</b>	46
3.1	Human studies	46
3.1.1	<i>Metabolism</i>	46
3.1.2	<i>Pharmacokinetics</i>	47
3.2	Experimental models	50
3.3	Genetic variation	50
<b>4.</b>	<b>Cancer-preventive effects</b>	50
4.1	Human studies	50
4.1.1	<i>Studies of colorectal cancer</i>	50
4.1.2	<i>Studies of sporadic adenomatous polyps in the colon</i>	58
4.1.3	<i>Studies of oesophageal and gastric cancers</i>	60
4.1.4	<i>Studies of cancers other than in the digestive tract</i>	62
4.1.5	<i>Issues in interpreting the evidence for prevention of colorectal cancer</i>	63
4.2	Experimental models	64
4.2.1	<i>Experimental animals</i>	64
4.2.2	<i>In-vitro models</i>	67
4.3	Mechanisms of chemoprevention	67
4.3.1	<i>Inhibition of carcinogen activation</i>	67
4.3.2	<i>Inhibition of cell proliferation</i>	68
4.3.3	<i>Apoptosis</i>	68
4.3.4	<i>Immune surveillance</i>	68
<b>5.</b>	<b>Other beneficial effects</b>	70
5.1	Antiplatelet effects	70
5.1.1	<i>Background</i>	70
5.1.2	<i>Mechanism</i>	70
5.1.3	<i>Secondary prevention in populations at high risk for cardiovascular events</i>	70
5.1.4	<i>Primary prevention in populations at average risk for cardiovascular events</i>	71
5.1.5	<i>Lowest effective dose for prevention of cardiovascular events in high-risk populations</i>	71
5.2	Alzheimer disease	71
5.3	Reproductive outcomes	71

<b>6. Carcinogenicity . . . . .</b>	72
6.1 Human studies . . . . .	72
<i>6.1.1 Renal cancer . . . . .</i>	72
<i>6.1.2 Haematopoietic malignancies . . . . .</i>	73
<i>6.1.3 Childhood cancer . . . . .</i>	73
6.2 Experimental animals . . . . .	73
<b>7. Other toxic effects . . . . .</b>	73
7.1 Adverse effects . . . . .	73
<i>7.1.1 Humans . . . . .</i>	73
<i>7.1.2 Experimental animals . . . . .</i>	81
7.2 Genetic and related effects . . . . .	84
<i>7.2.1 Humans . . . . .</i>	84
<i>7.2.2 Experimental models . . . . .</i>	84
<b>8. Summary of data . . . . .</b>	87
8.1 Chemistry, occurrence and human exposure . . . . .	87
8.2 Metabolism and kinetics . . . . .	87
8.3 Cancer-preventive effects . . . . .	87
<i>8.3.1 Humans . . . . .</i>	87
<i>8.3.2 Experimental animals . . . . .</i>	88
<i>8.3.3 Mechanism of action . . . . .</i>	88
8.4 Other beneficial effects . . . . .	88
8.5 Carcinogenicity . . . . .	88
<i>8.5.1 Humans . . . . .</i>	88
<i>8.5.2 Experimental animals . . . . .</i>	88
8.6 Toxic effects . . . . .	88
<i>8.6.1 Humans . . . . .</i>	88
<i>8.6.2 Experimental animals . . . . .</i>	89
<b>9. Recommendations for research . . . . .</b>	89
<b>10. Evaluation . . . . .</b>	90
10.1 Cancer-preventive activity . . . . .	90
<i>10.1.1 Humans . . . . .</i>	90
<i>10.1.2 Experimental animals . . . . .</i>	90
10.2 Overall evaluation . . . . .	90
<b>11. References . . . . .</b>	90
<b>Sulindac . . . . .</b>	103
<b>1. Chemical and physical characteristics . . . . .</b>	103
1.1 Name . . . . .	103
1.2 Structural and molecular formulae and relative molecular mass . . . . .	103
1.3 Physical and chemical properties . . . . .	103
1.4 Technical products . . . . .	103

<b>2.</b>	<b>Occurrence, production, use, analysis and human exposure . . . . .</b>	103
2.1	Occurrence . . . . .	103
2.2	Production . . . . .	103
2.3	Use . . . . .	104
2.4	Analysis . . . . .	104
2.5	Human exposure . . . . .	104
<b>3.</b>	<b>Metabolism, kinetics and genetic variation . . . . .</b>	104
3.1	Human studies . . . . .	104
	3.1.1 <i>Metabolism</i> . . . . .	104
	3.1.2 <i>Pharmacokinetics</i> . . . . .	104
3.2	Experimental models . . . . .	105
3.3	Genetic variation . . . . .	106
<b>4.</b>	<b>Cancer-preventive effects . . . . .</b>	106
4.1	Human studies . . . . .	106
	4.1.1 <i>Studies of adenomatous polyps in patients with familial adenomatous polyposis</i> . . . . .	106
	4.1.2 <i>Randomized clinical trial of sporadic adenomatous polyps</i> . . . . .	108
	4.1.3 <i>Case studies of treatment for desmoid tumours</i> . . . . .	108
4.2	Experimental models . . . . .	108
	4.2.1 <i>Experimental animals</i> . . . . .	108
	4.2.2 <i>In-vitro models</i> . . . . .	114
4.3	Mechanisms of chemoprevention . . . . .	114
	4.3.1 <i>Effects on cell proliferation and apoptosis</i> . . . . .	114
	4.3.2 <i>Effects on oncogene expression</i> . . . . .	115
<b>5.</b>	<b>Other beneficial effects . . . . .</b>	115
<b>6.</b>	<b>Carcinogenicity . . . . .</b>	115
6.1	Humans . . . . .	115
6.2	Experimental animals . . . . .	115
<b>7.</b>	<b>Other toxic effects . . . . .</b>	115
7.1	Adverse effects . . . . .	115
	7.1.1 <i>Humans</i> . . . . .	115
	7.1.2 <i>Experimental animals</i> . . . . .	117
7.2	Genetic and related effects . . . . .	117
<b>8.</b>	<b>Summary of data . . . . .</b>	117
8.1	Chemistry, occurrence and human exposure . . . . .	117
8.2	Metabolism and kinetics . . . . .	118
8.3	Cancer-preventive effects . . . . .	118
	8.3.1 <i>Humans</i> . . . . .	118
	8.3.2 <i>Experimental animals</i> . . . . .	118
	8.3.3 <i>Mechanism of action</i> . . . . .	118
8.4	Other beneficial effects . . . . .	118
8.5	Carcinogenicity . . . . .	118
8.6	Toxic effects . . . . .	118
	8.6.1 <i>Humans</i> . . . . .	118
	8.6.2 <i>Experimental animals</i> . . . . .	118
<b>9.</b>	<b>Recommendations for research . . . . .</b>	118

<b>10.</b>	<b>Evaluation</b>	119
10.1	Cancer-preventive activity	119
	<i>10.1.1 Humans</i>	119
	<i>10.1.2 Experimental animals</i>	119
10.2	Overall evaluation	119
<b>11.</b>	<b>References</b>	119
<b>Piroxicam</b>		127
<b>1.</b>	<b>Chemical and physical characteristics</b>	127
1.1	Name	127
1.2	Structural and molecular formulae and relative molecular mass	127
1.3	Physical and chemical properties	127
1.4	Technical products	127
<b>2.</b>	<b>Occurrence, production, use, analysis and human exposure</b>	127
2.1	Occurrence	127
2.2	Production	127
2.3	Use	127
2.4	Analysis	128
2.5	Human exposure	128
<b>3.</b>	<b>Metabolism, kinetics and genetic variation</b>	128
3.1	Human studies	128
	<i>3.1.1 Metabolism</i>	128
	<i>3.1.2 Pharmacokinetics</i>	128
3.2	Experimental models	132
	<i>3.2.1 Metabolism</i>	132
	<i>3.2.2 Pharmacokinetics</i>	132
3.3	Genetic variation	133
<b>4.</b>	<b>Cancer-preventive effects</b>	133
4.1	Human studies	133
4.2	Experimental models	134
	<i>4.2.1 Experimental animals</i>	134
	<i>4.2.2 In-vitro models</i>	138
4.3	Mechanisms of chemoprevention	139
	<i>4.3.1 Preneoplastic lesions</i>	139
	<i>4.3.2 Inhibition of carcinogen activation</i>	139
	<i>4.3.3 Effects on cell proliferation and apoptosis</i>	140
	<i>4.3.4 Immune surveillance</i>	140
<b>5.</b>	<b>Other beneficial effects</b>	141
<b>6.</b>	<b>Carcinogenicity</b>	141
6.1	Humans	141
6.2	Experimental animals	141

<b>7.</b>	<b>Other toxic effects . . . . .</b>	141
7.1	Adverse effects . . . . .	141
	7.1.1 <i>Humans</i> . . . . .	141
	7.1.2 <i>Experimental animals</i> . . . . .	141

## **Indomethacin . . . . .** 151

<b>1.</b>	<b>Chemical and physical characteristics . . . . .</b>	151
1.1	Name . . . . .	151
1.2	Structural and molecular formulae and relative molecular mass . . . . .	151
1.3	Physical and chemical properties . . . . .	151
1.4	Technical products . . . . .	151
<b>2.</b>	<b>Occurrence, production, use, analysis and human exposure . . . . .</b>	151
2.1	Occurrence . . . . .	151
2.2	Production . . . . .	151
2.3	Use . . . . .	152
2.4	Analysis . . . . .	152
2.5	Human exposure . . . . .	152

<b>3.</b>	<b>Metabolism, kinetics and genetic variation</b>	152
3.1	Human studies	152
	3.1.1 <i>Metabolism</i>	152
	3.1.2 <i>Pharmacokinetics</i>	152
3.2	Experimental models	156
3.3	Genetic variation	157
<b>4.</b>	<b>Cancer-preventive effects</b>	157
4.1	Human studies	157
	4.1.1 <i>Studies of cancer occurrence</i>	157
	4.1.2 <i>Studies of other relevant end-points</i>	158
4.2	Experimental models	158
	4.2.1 <i>Experimental animals</i>	158
	4.2.2 <i>In-vitro models</i>	171
4.3	Mechanisms of chemoprevention	172
	4.3.1 <i>Inhibition of carcinogen activation</i>	172
	4.3.2 <i>Effects on cell proliferation and apoptosis</i>	172
	4.3.3 <i>Immune surveillance</i>	175
<b>5.</b>	<b>Other beneficial effects</b>	176
<b>6.</b>	<b>Carcinogenicity</b>	176
6.1	Humans	176
6.2	Experimental animals	176
<b>7.</b>	<b>Other toxic effects</b>	177
7.1	Adverse effects	177
	7.1.1 <i>Humans</i>	177
	7.1.2 <i>Experimental animals</i>	178
7.2	Genetic and related effects	183
	7.2.1 <i>Humans</i>	183
	7.2.2 <i>Experimental models</i>	183
<b>8.</b>	<b>Summary of data</b>	184
8.1	Chemistry, occurrence and human exposure	184
8.2	Metabolism and kinetics	184
8.3	Cancer-preventive effects	184
	8.3.1 <i>Humans</i>	184
	8.3.2 <i>Experimental animals</i>	184
	8.3.3 <i>Mechanism of action</i>	184
8.4	Other beneficial effects	184
8.5	Carcinogenicity	184
	8.5.1 <i>Humans</i>	184
	8.5.2 <i>Experimental animals</i>	184
8.6	Toxic effects	184
	8.6.1 <i>Humans</i>	184
	8.6.2 <i>Experimental animals</i>	185
<b>9.</b>	<b>Recommendations for research</b>	185

---

<b>10.</b>	<b>Evaluation</b>	185
10.1	Cancer-preventive activity	185
	<i>10.1.1 Humans</i>	185
	<i>10.1.2 Experimental models</i>	185
10.2	Overall evaluation	185
