## **SUMMARY OF FINAL EVALUATIONS**

Agent	Degree of evidence of carcinogenicity		Overall evaluation of carcinogenicity
	Human	Animal	to humans
Ethylene	I	I	3
Ethylene oxide	L	S	$1^b$
Propylene	I	I	3
Propylene oxide	I	S	2B
Isoprene	$\mathbf{I}^{a}$	S	2B
Styrene	I	L	$2B^b$
Styrene-7,8-oxide	$\mathbf{I}^{a}$	S	$2A^b$
4-Vinylcyclohexene	$\mathbf{I}^{a}$	S	2B
4-Vinylcyclohexene diepoxide	$\mathbf{I}^{a}$	S	2B
Vinyl toluene	$\mathbf{I}^{a}$	ESL	3
Acrylamide	I	S	$2A^b$
N-Methylolacrylamide	$\mathbf{I}^{a}$	L	3
Methyl methacrylate	I	ESL	3
2-Ethylhexyl acrylate	$\mathbf{I}^{a}$	L	3

S, sufficient evidence; L, limited evidence; I, inadequate evidence; ESL, evidence suggesting lack of carcinogenicity; for definitions of categories and groups, see preamble, pp. 27-30

<sup>&</sup>lt;sup>a</sup>No data available

<sup>&</sup>lt;sup>b</sup>Other relevant data taken into account in making the overall evaluation
