Non-Ionizing Radiation, Part 2: Radiofrequency Electromagnetic Fields	2.2.1	Text	173	The description of the Oberfeld (2008) study was removed from both text and tables, and an explanatory paragraph was inserted on page 173: [Oberfeld (2008): the status of this study (printed version, German and English online versions) is controversial. It was therefore decided to remove the description of this study from text and tables.]	April 2013	Yes, November 2013	Yes, this volume appeared in print in January 2014			
	2.2.1	Table 2.7	168					Preamble	A, 6	Text
Preamble	A, 6	Text	5	A sentence was deleted from the Working Procedures, as follows: “... Subsequently, relevant biological and epidemiological data are collected by IARC from recognized sources of information on carcinogenesis, including data storage and retrieval systems such as PubMed. Meeting participants who are asked to prepare preliminary working papers for specific sections are expected to supplement the IARC literature searches with their own searches. For most chemicals and some complex mixtures, the major collection of data and the preparation of working papers for the	April 2013	Yes, 7 September 2015	No

				<p>sections on chemical and physical properties, on analysis, on production and use, and on occurrence are carried out under a separate contract funded by the US National Cancer Institute. Industrial associations, labour unions and other knowledgeable organizations may be asked to provide input to the sections on production and use, although this involvement is not required as a general rule. Information on production and trade is obtained from governmental, trade and market research publications and, in some cases, by direct contact with industries. ...”</p>
