

# Errors in Volume VII

## **1. Mali, Bamako**

The male and female populations were reversed in Volume VII.

## **2. Zimbabwe, Harare: African**

The populations at risk for the period 1990–92 were estimated by linear interpolation, within ethnic, sex and age groups, between the census data of 1982 and 1992. An error in the calculation resulted in a small under-estimate of the size of the African population by 4.4%, resulting in over-estimation of reported incidence rates. The correct numbers, as average annual population, are:

<b>Male</b>	<b>Age</b>	<b>Female</b>
73277	0–4	74232
62027	5–9	64993
47994	10–14	51707
52330	15–19	67679
80652	20–24	77474
65889	25–29	52944
50787	30–34	38729
39902	35–39	27647
27170	40–44	16886
20285	45–49	11159
16796	50–54	8611
10752	55–59	4594
8124	60–64	3470
3289	65–69	1886
3537	70+	3135
562811	Total	505148
