

Acknowledgements

This book, IARC Technical Publication No. 45, attempts to guide practising or trainee clinicians caring for women with, or at risk of, precancer and early cancer of the cervix. Partha Basu kindly contributed Chapters 14 and 15.

Profound thanks go to the reviewers of individual chapters or the entire book: Margaret Cruickshank, Mary Martin, Pierre Martin-Hirsch, Groesbeck Parham, and John Tidy. Thank you also to those who generously allowed their photographs to be used in this manual: Mihaela Badea, Partha Basu, Christine Bergeron, Montserrat Cararach, Xavier Carcopino, René and Isabelle Cartier, Quek Swee Chong, John Doorbar, Goran Grubišić, David Hicks, Michael Jeffers, Peter J. Pronovost, Ramani Rajendran, Catherine Sauvaget, and Mark H. Stoler (a full list of sources is provided at the end of this book). All of these people were immensely helpful in preparing and editing the manual.

Krittika Pitaksaringkarn was indispensable in keeping the project on track and managing the timely publication, as well as performing the layout. We are grateful to our in-house publishing team of Karen Müller and Sylvia Lesage, for ensuring the typographical, grammatical, and labelling accuracy of the text. We thank Lakshmi Sankaranarayanan, who helped with the drawings of illustrations.
