BACKGROUND AND PURPOSE OF THE IARC PROGRAMME ON THE EVALUATION OF THE CARCINOGENIC RISK OF CHEMICALS TO MAN .....	8
SCOPE OF THE MONOGRAPHS .....	8
MECHANISM FOR PRODUCING THE MONOGRAPHS .....	9
Priority for the preparation of monographs .....	9
Data on which the evaluation was based .....	9
The Working Group.....	9
GENERAL REMARKS ON THE EVALUATION .....	10
Terminology .....	10
Response to carcinogens .....	10
Qualitative aspects .....	10
Quantitative aspects .....	11
Extrapolation from animals to man .....	11
Evidence of human carcinogenicity .....	11
Mixtures and groups of carcinogens .....	12
EXPLANATORY NOTES ON THE MONOGRAPHS .....	12
THE MONOGRAPHS	
Inorganic substances:	
Beryllium and beryllium compounds .....	17
Haematite and iron oxide .....	29
Lead salts .....	40
Chlorinated hydrocarbons:	
Carbon tetrachloride .....	53
Chloroform .....	61
Aromatic amines:	
Auramine .....	69
4-Aminobiphenyl .....	74
Benzidine .....	80
3,3'-Dimethylbenzidine (o-Tolidine).....	87
N-Nitroso compounds:	
N-Nitrosodimethylamine .....	95
N-Nitrosodiethylamine .....	107
Nitrosomethylurea .....	125
Nitrosoethylurea .....	135
N-Methyl-N,4-dinitrosoaniline .....	141
Natural products:	
Aflatoxins .....	145
Cycasin .....	157
Safrole, isosafrole and dihydrosafrole .....	169
Sterigmatocystin .....	175
Miscellaneous:	
N <sub>4</sub> -(5-nitro-2-furyl)-2-thiazolyl <sub>1</sub> acetamide .....	181
