

3	Tumours of the heart	227			
	Introduction	228		Type B2 thymoma	336
	Benign tumours			Type B3 thymoma	340
	Papillary fibroelastoma	230		Micronodular thymoma with lymphoid stroma	345
	Cardiac myxoma	233		Metaplastic thymoma	347
	Cardiac fibroma	237		Lipofibroadenoma	349
	Cardiac rhabdomyoma	239		Thymic carcinoma	
	Adult cellular rhabdomyoma	241		Introduction	351
	Cardiac lipoma and lipomatous hypertrophy of the atrial septum	243		Squamous cell carcinoma	354
	Lipomatous hamartoma of the atrioventricular valve	245		Basaloid carcinoma	359
	Hamartoma of mature cardiac myocytes	247		Lymphoepithelial carcinoma	361
	Mesenchymal cardiac hamartoma	249		NUT carcinoma of the thorax	364
	Cardiac haemangiomas	251		Clear cell carcinoma	368
	Conduction system hamartoma	253		Low-grade papillary adenocarcinoma	370
	Cystic tumour of the atrioventricular node	256		Mucoepidermoid carcinoma	372
	Malignant tumours			Thymic carcinoma with adenoid cystic carcinoma-like features	375
	Cardiac angiosarcoma	258		Enteric-type adenocarcinoma	377
	Cardiac leiomyosarcoma	260		Adenocarcinoma NOS	379
	Cardiac undifferentiated pleomorphic sarcoma	262		Adenosquamous carcinoma	381
	Other sarcomas that may involve the heart	265		Sarcomatoid carcinoma	383
	Haematolymphoid tumours			Undifferentiated carcinoma	386
	Introduction	266		Thymic carcinoma NOS	388
	Cardiac diffuse large B-cell lymphoma	267		Thymic neuroendocrine neoplasms	
	Cardiac fibrin-associated diffuse large B-cell lymphoma	269		Introduction	
				Neuroendocrine tumours	389
				Carcinoid/neuroendocrine tumour	391
				Neuroendocrine carcinomas	
				Small cell carcinoma	395
				Large cell neuroendocrine carcinoma	397
4	Mesenchymal tumours of the thorax	273	6	Germ cell tumours of the mediastinum	399
	Introduction	274		Introduction	400
	Mesenchymal tumours			Seminoma	402
	Adipocytic tumours			Embryonal carcinoma	405
	Lipoma	276		Yolk sac tumour	407
	Thymolipoma	278		Choriocarcinoma	412
	Liposarcoma	280		Teratoma	414
	Fibroblastic and myofibroblastic tumours			Mixed germ cell tumours	417
	Desmoid fibromatosis	282		Germ cell tumours with somatic-type solid malignancy	419
	Solitary fibrous tumour	284		Germ cell tumours with associated haematological malignancy	422
	Calcifying fibrous tumour	286		7	Haematolymphoid tumours of the mediastinum
	Inflammatory myofibroblastic tumour	288		Introduction	426
	Myxofibrosarcoma	290		Primary mediastinal large B-cell lymphoma	427
	Vascular tumours			MALT lymphoma	430
	Haemangioma	292		T-lymphoblastic leukaemia/lymphoma	432
	Lymphangioma	294		Classic Hodgkin lymphoma	435
	Epithelioid haemangioendothelioma	296		Mediastinal grey zone lymphoma	438
	Angiosarcoma	299		Follicular dendritic cell sarcoma	441
	Skeletal muscle tumours			Myeloid sarcoma	443
	Rhabdomyosarcoma	301		8	Ectopic tumours of thyroid and parathyroid origin
	Peripheral nerve sheath and neural tumours			Ectopic thyroid tumours	446
	Paraganglioma	303		Ectopic parathyroid tumours	448
	Granular cell tumour	305		9	Metastases
	Schwannoma	307		Metastasis to the lung	452
	Malignant peripheral nerve sheath tumour	309		Metastasis to the pleura	459
	Peripheral neuroblastic tumours	311		Metastasis to the thymus and mediastinal lymph nodes	463
	Tumours of uncertain differentiation			Metastasis to the heart and pericardium	467
	Synovial sarcoma	314			
	Undifferentiated small round cell sarcomas	316			
5	Tumours of the thymus	319			
	Epithelial tumours				
	Thymoma				
	Introduction	320			
	Type A thymoma (including atypical subtype)	326			
	Type AB thymoma	329			
	Type B1 thymoma	332			

10 Genetic tumour syndromes involving the thorax	471
Introduction	472
Li–Fraumeni syndrome	474
<i>BAP1</i> tumour predisposition syndrome	476
Carney complex	478
