| NOTE TO THE READER | 7 |
| LIST OF PARTICIPANTS | 9 |
| PREAMBLE | |
| Background | 15 |
| Objective and Scope | 15 |
| Selection of Chemicals and Complex Mixtures for Monographs | 16 |
| Working Procedures | 16 |
| Data for Evaluations | 17 |
| The Working Group | 17 |
| General Principles | 17 |
| Explanatory Notes on the Monographs Contents | 25 |
| TOBACCO SMOKING | |
| General introduction: Smoking and the public health | 37 |
| Worldwide use of smoking tobacco | 47 |
| 1. Production of and trade in tobacco | 47 |
| (a) Historical aspects | 47 |
| (b) Tobacco types | 49 |
| (c) Production and trade | 49 |
| (d) Modification of raw materials | 54 |
| 2. Manufacture and usage | 54 |
| (a) Forms utilized | 54 |
| (b) Product design and delivery | 57 |
| (c) Tar and nicotine yields | 60 |
| 3. Smoking and public health considerations | 65 |
| (a) Estimates of tobacco consumption in different countries | 67 |
| (b) Sales trends | 74 |

| | |
|--|-----------|
| (c) Surveys of smoking behaviour | 74 |
| (d) Indices of dose in developing countries | 75 |
| 4. Summary | 80 |
| Chemistry and analysis of tobacco smoke | 83 |
| 1. Physicochemical nature of tobacco smoke | 83 |
| 2. Total particulate matter | 84 |
| 3. Chemical composition | 86 |
| (a) Carbon oxides | 94 |
| (b) Nitrogen oxides | 95 |
| (c) Ammonia and volatile amines | 95 |
| (d) Hydrogen cyanide | 96 |
| (e) Volatile aldehydes and ketones | 96 |
| (f) Other volatile compounds | 97 |
| (g) Nonvolatile alkanes and alkenes | 98 |
| (h) Isoprenoids | 98 |
| (i) Phytosterols | 99 |
| (j) Polynuclear aromatic compounds | 100 |
| (k) Alcohols | 103 |
| (l) Nonvolatile aldehydes and ketones | 103 |
| (m) Phenolic compounds and quinones | 104 |
| (n) Carboxylic acids, esters and lactones | 105 |
| (o) Amines and amides | 107 |
| (p) Tobacco alkaloids | 109 |
| (q) Pyridines, pyrroles and pyrazines | 110 |
| (r) <i>N</i> -Nitrosamines | 110 |
| (s) Inorganic constituents | 114 |
| (t) Radioelements | 116 |
| (u) Agricultural chemicals | 118 |
| (v) Additives | 118 |
| 4. Sidestream smoke and air pollution by tobacco smoke | 120 |
| (a) Formation of sidestream smoke | 120 |
| (b) Analysis of sidestream smoke | 121 |
| (c) Air pollution by tobacco smoke | 124 |

| | |
|--|------------|
| 5. Summary | 126 |
| Biological data relevant to the evaluation of carcinogenic risk to humans | 127 |
| 1. Carcinogenicity studies in animals | 127 |
| (a) Inhalation of tobacco smoke | 127 |
| (b) Inhalation of cigarette smoke in conjunction with administration of known carcinogens and other agents | 134 |
| (c) Administration of tobacco-smoke condensates | 135 |
| 2. Other relevant biological data from experimental studies | 140 |
| (a) Toxicity of tobacco smoke in animals | 140 |
| (b) Metabolic effects of tobacco smoke | 149 |
| (c) Mutagenicity and other short-term tests | 153 |
| 3. Observations in humans | 163 |
| (a) Methods of measuring intake of tobacco smoke | 163 |
| (b) Measurement of inhalation and factors influencing the extent of inhalation | 170 |
| (c) Deposition of smoke on bronchi | 179 |
| (d) Tobacco smoke-induced alterations in host defence mechanisms | 183 |
| (e) Genetic host factors that influence susceptibility to tobacco smoke | 185 |
| (f) Biological measures of exposure and effects of tobacco smoke | 189 |
| 4. Summary | 194 |
| Epidemiological studies of cancer in humans | 199 |
| 1. Introduction | 199 |
| 2. Cancer of the lung | 203 |
| (a) Factors affecting risk | 203 |
| (b) Histological types and association with smoking | 221 |
| (c) Proportion of risk currently attributable to smoking | 228 |
| (d) Trends in lung cancer incidence in relation to cigarette usage | 235 |
| (e) Summary | 242 |
| 3. Cancer of the urinary tract | 244 |
| (a) Geographic and temporal correlation studies | 244 |
| (b) Analytical studies | 244 |
| (c) Estimates of risk attributable to smoking | 270 |
| (d) Summary | 270 |

| | |
|--|-----|
| 4. Cancer in other organs | 270 |
| (a) Cancers of the upper respiratory and upper digestive tracts | 270 |
| (b) Cancer of the stomach | 276 |
| (c) Cancer of the liver | 276 |
| (d) Cancer of the pancreas | 279 |
| (e) Cancer of the cervix | 282 |
| (f) Cancer of the endometrium | 292 |
| (g) Cancer of the breast | 293 |
| (h) Summary | 293 |
| 5. Interactions with other causative factors | 298 |
| (a) Alcohol | 299 |
| (b) Asbestos | 300 |
| (c) Radiation | 302 |
| (d) Summary | 302 |
| 6. Cancers related to passive exposure to tobacco smoke | 303 |
| (a) Cancer of the lung | 304 |
| (b) Cancers in organs other than the lung | 305 |
| (c) Childhood cancers and parental cigarette smoking | 305 |
| (d) Summary | 308 |
| Conclusions and evaluations | 309 |
| 1. Conclusions | 309 |
| (a) Usage and trends | 309 |
| (b) Carcinogenicity in animals | 309 |
| (c) Genetic activity and short-term test results | 310 |
| (d) Human exposure | 311 |
| (e) Genetic host factors | 312 |
| (f) Cancer in humans | 312 |
| 2. Evaluations | 314 |
